out board

The **LV-Series** controllers are designed to operate multiple Low-Voltage chain-hoist motors in a wide range of staging and rigging applications, with switched power outlets and separate control lines. All units have a variety of linkable Remote Control and Emergency Stop options and are automation-ready.

LV6 and LV12 feature 3-way mixed control and power on female Socapex-style (Ceep) connectors, LV8 provides separate 4-way control and power on pairs of male and female Socapex-style (Ceep) connectors. LV4 comes with rear-panel C-Form control and power. Rugged design and durable switching hardware, all housed in a compact 3U (4U for LV4) 19" rack-mount chassis suited to touring or installation.

LV-Series are ideal for all Low-Voltage controlled hoists such as CM Lodestars and Prostars as well as most other brands.

DV-Series Direct Control Chain-Hoist Controllers and Accessories

DV8

For detailed specifications, please visit us at www.outboard.co.uk, or call

out board

The **DV-Series** controllers are designed to operate four or eight Direct Control chain-hoist motors in staging and rigging applications, with internal contactors to provide direction control by switching phase rotation. All units have a variety of linkable Remote Control and Emergency Stop options and are automation-ready.

DV4

DV4 features heavy-duty C-Form outlets while DV8 uses Socapex-style (Ceep) multipin connectors. Rugged design and durable switching hardware, all housed in a compact 3U 19" rack-mount chassis suited to touring or installation.

DV-Series are ideal for all direct control hoists such as Verlinde, Chainmaster or new CM direct control variants.
